MAXIMUM
RELAXATION

Since 1937

Narvi, a Finnish sauna stove brand with over 80 years of history, plays a key role in a market blending tradition and modernity. Known for handcrafted stoves made in Lapinkylä, Rauma, Narvi has been trusted for creating sauna experiences for homes and public saunas alike.

A new era of professional sauna heaters

In 2024, Narvi acquired the business operations of Saunapiste, after which Narvi continued the production of HPK/HST professional sauna heaters. These HPK/HST electrical heaters are now known as Narvi Heat. Narvi Heat professional sauna heaters withstand extremely demanding use and are trusted heaters, for example, in swimming pools and spas. Our selection includes heaters, control centers, installation bases, sauna stones, and other accessories - everything you need when extreme durability is required from a heater.

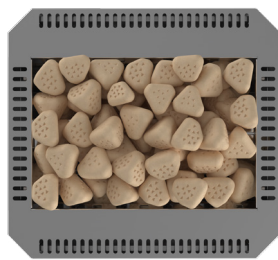

NRVI

NARVI HEAT

MAXIMUM DURABILITY

Narvi Heat professional sauna heaters are designed for large saunas and to withstand extremely demanding use. They are made of acid-resistant steel and equipped with extra strong Incoloy-heating elements. Thanks to the maximum durability of the Narvi Heat heater, it is the superior choice for heavy use in places such as swimming pools, hotels, spas, and gyms. Narvi Heat sauna heaters are controlled by the Narvi Logi control center, also designed for professional use. Each Narvi Heat is manufactured in Lapinkylä, Rauma.

NARVI HEAT	Sauna room size (m ³)	Dimensions (cm)			Heater weight (kg)	Stone capacity ceramic (kg)	Safety distance (cm) to combustible / non-combustible material			
		H	W	D			Side	Rear	Front	Top
10,2 kW	9-12	81,5	47,5	53	43	12 / 5	12 / 5	120 / 5	149 / 100	
11,9 kW	11-14		62,5		51					
15,3 kW	15-18		62,5		52					
20,4 kW	19-23		77,5		65					
25,5 kW	24-28		92,5		75,5					
30,6 kW	29-35		107,5		85,5					
40,8 kW	36-46		137,5		105,5					

Casing and construction material: acid-resistant steel

Controller and additional accessories:

Narvi Logi -Controller and external power units
Narvi Heat- installation bases

BEST CHOICE FOR SWIMMING POOLS, SPAS, AND SAUNAS CENTERS

MADE OF ACID-RESISTANT STEEL

REPLACEABLE HEATING ELEMENT CARTRIDGE

USED WITH DURABLE CERAMIC SAUNA STONES

OPTIONAL ADJUSTABLE LEGS AND INSTALLATION BASE FOR THE HEATER

NARVI LOGI CONTROL CENTERS FOR HEATER CONTROL

MADE IN FINLAND

DID YOU KNOW?

In 2024, Narvi acquired the business operations of Saunapiste, after which Narvi continued the production of HPK/HST industrial electric heaters.

These HPK/HST electric heaters are now known as Narvi Heat. Swimming pools, spas, and other public saunas rely on this product.

INSTALLATION BASE - NARVI HEAT	Dimensions (cm)		
	H	W	D
10,2 kW	11,6 (+2 cm)	48,8	53,5
11,9 kW		58,8	53,5
15,3 kW		58,8	53,5
20,4 kW		73,8	53,5
25,5 kW		88,8	53,5
30,6 kW		107,7	53,5
40,8 kW		132,6	53,5

Casing: acid-resistant steel

HEAT STONE SETS	KERKES SIZES (kg)				Total (kg)
	6 cm	8 cm	Small tetra	Big tetra	
10,2 kW	40	-	20	-	60
11,9 kW	40	-	20	-	60
15,3 kW	40	-	20	-	60
20,4 kW	-	40	20	20	80
25,5 kW	-	60	30	20	110
30,6 kW	-	80	30	40	150
40,8 kW	-	80	40	40	160

Narvi Heat -sauna heaters are only used with ceramic sauna stones.

NARVI LOGI

Narvi Logi controller has all the features you need for professional control of the Narvi Heat industrial electric heater. The control center is used via a web browser-based user interface connected to the facility's local network, for example, from the swimming pool control room or the hotel reception. The control center comes with the control center unit and two temperature sensors for the sauna room.

PROFESSIONAL USE

- separate passwords for different user groups (user/admin)
- alerts for deviations
- two different on times can be set for the same day in the user interface (separate temperatures can be selected for each use period)
- temperature adjustment from 60-105°C, with 1°C precision
- temperature alarm limits
- temperature hysteresis limit adjustment (responds quickly to temperature fluctuations)
- quick manual operation for 3 hours, adjustable manual operation time adjustable from 1-18 hours
- controllable from the facility's control room, connected to the facility's local network
- alternating resistor groups every two weeks
- maintenance program
- two PT100 waterproof temperature sensors, the temperature sensor housing in the sauna includes overheat protection (fusible and resettable)
- sensor instrument cables not included in the delivery – IP20
- display logic module

COMPATIBILITY

- VAK control, VAK control with top data (on/off)
- Modbus TCP bus for building automation

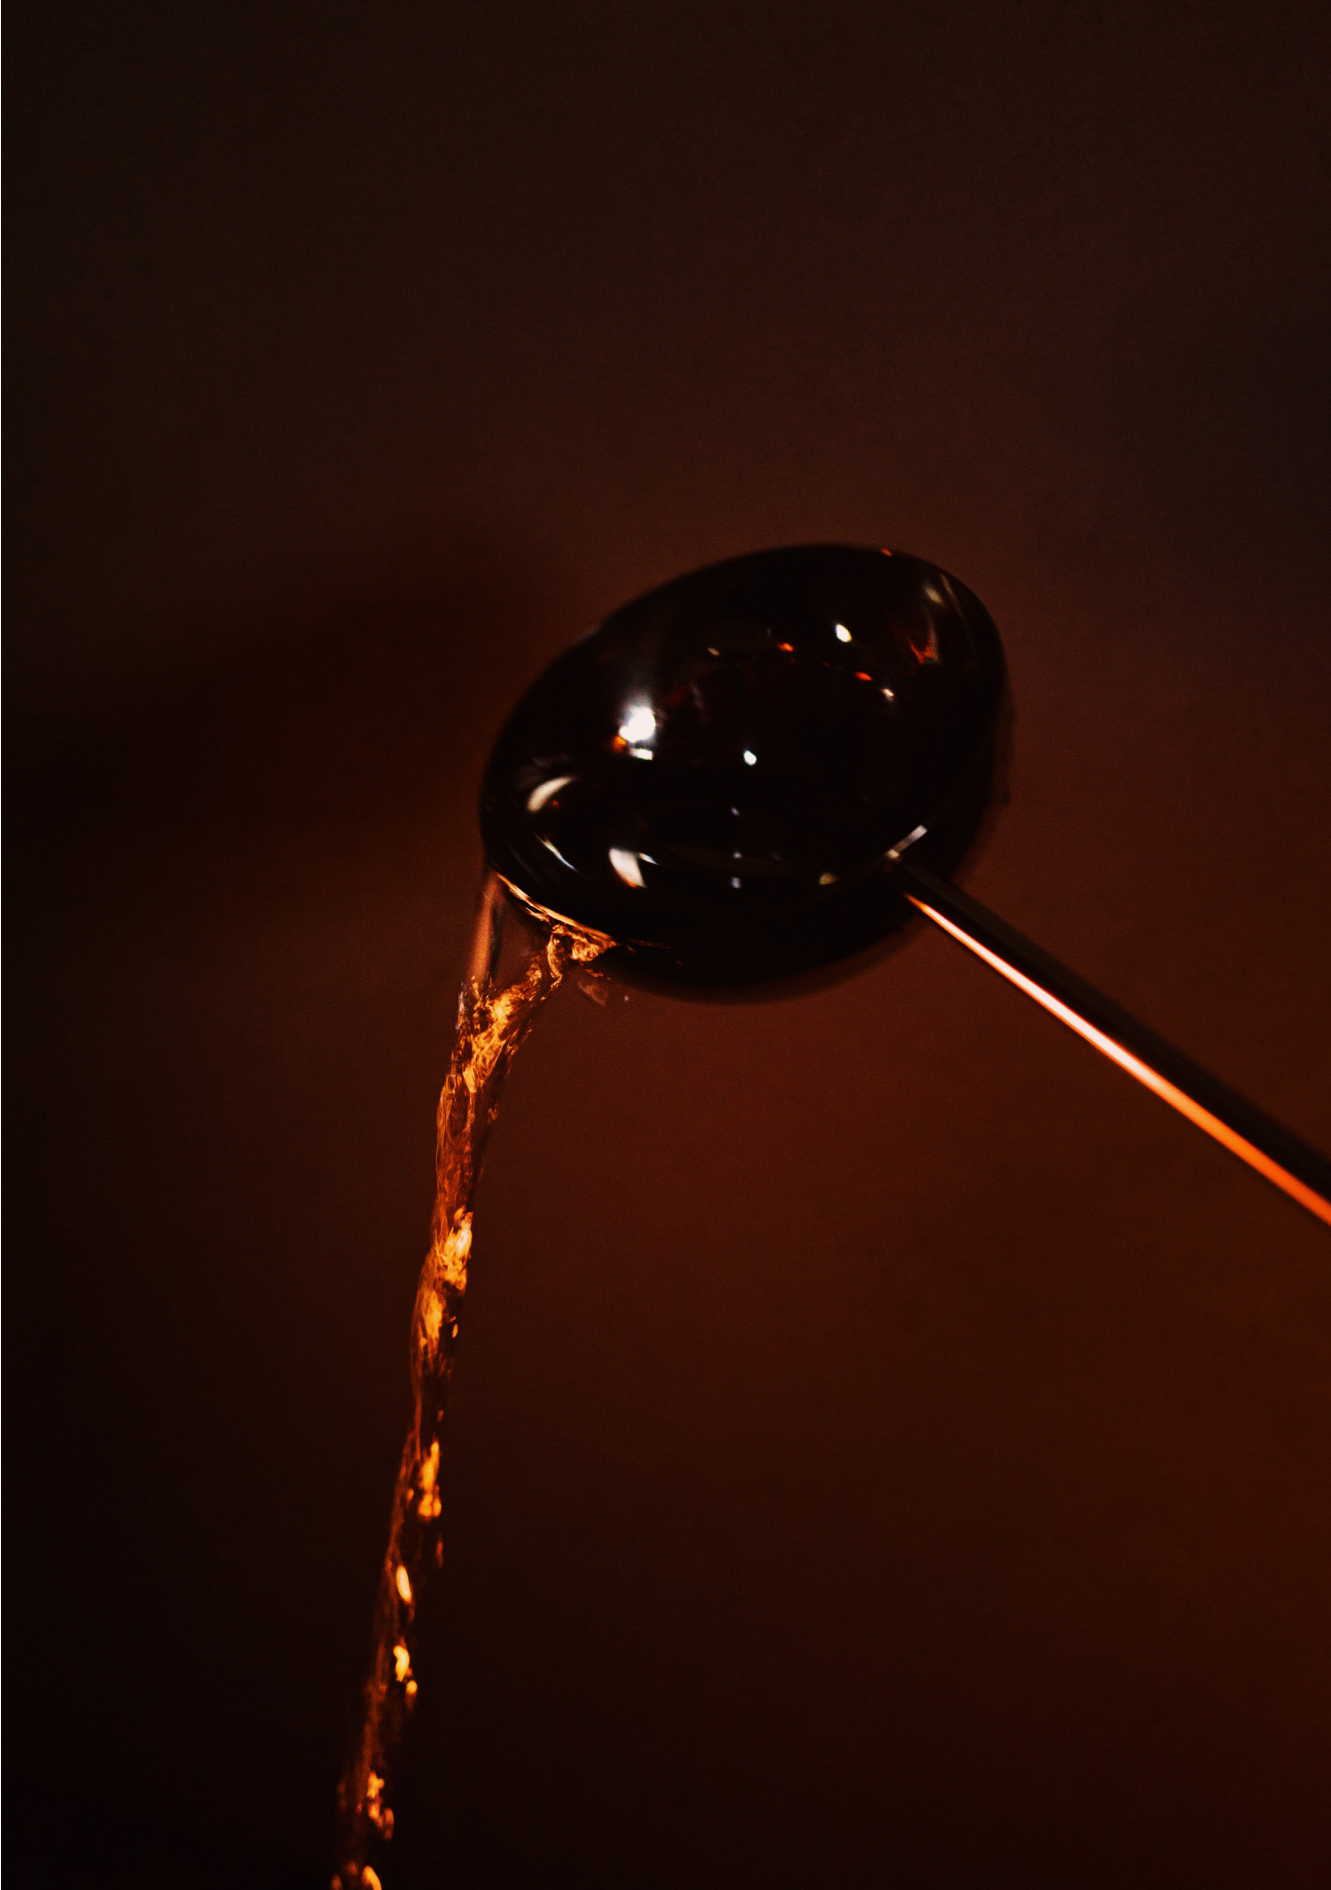

OPTIONS

- measurement of the heater's electricity consumption
- additional output for four future expansions such as sauna automation, lighting control, evaporator control, ventilation control, etc.

NARVI LOGI	Max. effect	Wire protectors Ampers	Dimensions (cm)		
			H	W	D
Narvi Logi controller 20 A	12,0 kW	20	61	40,5	13,5
Narvi Logi controller 40 A	21,0 kW	40			
Narvi Logi controller 63 A	33,6 kW	63			
Narvi Logi controller 80 A	50,0 kW	80			
Narvi Logi external power unit 63 A	33,6 kW	63			
Narvi Logi external power unit 80 A	50,0 kW	80			

Casing: acid-resistant steel

An external power unit is needed in addition to the controller when two heaters are installed in the sauna.
