

NARVI WIFI - MULTIPLE APP USERS

Narvi WiFi sauna controller can be remote controlled by one or several users.

Each controller has ONE MASTER USER, and the mobile phone number of the master user will be the username for the heater/controller. Other users will login to the app with the master users phone number.

After the master user has registered the sauna heater and controller, other users are added as following:

- 1. In the start menu, choose "Login" or "Kirjaudu" if the app is in Finnish language**
- 2. Add the master users phone number**
- 3. Master user will receive a SMS code.**
- 4. Insert the code that the master user received, and the heater is now ready to be controlled.**

NOTE! Each user has an own PIN-code, even though the master users phone number is everyones user name.
